Your first HSK 3.0 practice test

1 Pick your level

Download one complete level pack from the README. Unzip it before opening files. You do not need a GitHub account.

2 Open the test and audio

Open test.pdf and keep answers.pdf closed. Play listening.mp3 using your normal audio player. Print the practice answer sheet or use blank paper.

3 Follow the paper

Read the cover and follow the audio instructions. The paper states section times and answer-transfer time. Do not add another timer on top of the audio pauses.

4 Check and learn

Open answers.pdf only after finishing. Count correct objective answers. Treat writing, translation and speaking as work to review with a teacher; a raw percentage is not an official HSK score.

5 Practise speaking

Levels 3-6 include a separate speaking paper and audio. Levels 7-9 include speaking inside test.pdf plus a separate speaking recording. Record your own voice on your phone.

6 Revisit your mistakes

Use the mistake log after each session. Review the cause of each mistake before repeating the same sample. A second attempt measures familiarity as well as improvement.

Materials: new HSK 3.0 sample set, organised from the official sample package supplied locally. Original exam PDFs are unchanged; audio is compressed for smaller downloads. Independent learner guide by hsk-tutor.com.
